

SCHEDULE 40 PLUMBING PROTOCOL

CREATED: 9/26/22 REV: 8/13/24

This protocol was devised in response to a dispute in which I was ordered by Brady Morris to stop purchasing the proper PRESSURE RATED pipe fittings for installation on fireproofing pumps. He stated to me that he has "Never seen one grenade", "This is massive overkill", "We'll use the ones you have, but don't buy any more", and "These were all purchased from Kimmel or PDQuipment and are what everyone is using". This was done despite my clear demonstration of the unsuitability of these parts for such purposes by showing them relevant catalog data and manufacturer data sheets. All machines and hoses that CMM had on hand when I was first hired were already so equipped, and I have never personally fitted these parts to a machine. As a result, I have taken the following steps and created the following protocol:

IN EVENT OF AN ACCIDENT:

Should an incident occur as a result of the use of improper parts against my admonitions, the following protocol shall be executed upon my knowledge of such occurrence:

- 1). Effective immediately, my employment with C.M. Morris Group is terminated. Proper notification shall be given to Anthony Billich, Katy Billich, and Brady Morris via email at the first possible opportunity. This event will be logged on my website. The following statement shall be issued:

"Due to an incident which has occurred involving improper parts fitted to C.M. Morris equipment against multiple admonitions given personally by myself, my employment with C.M. Morris is immediately terminated".

- 2). Addendums have been installed in the machine manuals as follows:

Putzmeister Manuals:

Added to page entitled "Guide to the Spare Parts List". Original section 4 concerning shipping hours and of no consequence to operation of the machine was replaced. Original text:

4. Shipping Hours:

All non —stocking orders received by 3:00 P.M. local time will be processed that day. (All orders will be shipped as complete as possible via the method requested by the ordering person.) If you require the order shipped complete, please advise the parts customer service representative and the order will only be shipped when all parts are available. As back-ordered items are received, parts personnel will contact you for delivery instructions.

Replaced with:

4. Schedule 40 Plumbing Parts:

Schedule 40 and class 150 plumbing parts have been installed by cm morris on the hoses and manifolds of their fireproofing pumps against maintenance department admonitions. These installations were performed by field personnel and not the maintenance mechanic. This addendum was created on the thirteenth of september two thousand two hundred and twenty two.

Western Equipment Manuals:

The following text was added to page 3 entitled "Limited Warranty". This was an addition and nothing was deleted:

Schedule 40 and class 150 plumbing parts have been installed by cm morris on the hoses and manifolds of their fireproofing pumps against maintenance

department admonitions. These installations were performed by field personnel and not the maintenance mechanic. This addendum was created on the thirteenth of september two thousand two hundred and twenty two.

- 3). The www link to this information will be given to all who ask me questions related in any way to the incident that triggered invocation of this protocol.
